Let us, we beseech you, have a brief respite.

The Laundry Menace.

How the laundry may become a source of diffusion of certain unsuspected infections was pointed out by Dr. Dederer, in a recent number of the American Journal of Public Health. It is not asserted that danger to public health would result from washing uninfected clothing in the same water with infected clothing. Infection is here precluded by the sterilizing action of heat and friction with soap. The danger aphas been made ready for delivery. taminated by unclean hands.

Infection may take place in the where the soiled linen is kept and regulations during the continuance of handled by the same people. Laun. the abovementioned restrictions in Newdry workers should not eat or drink dothing with a clean mantle or sheet as well as the public.

tutions which are performing household functions.

To-day the handling of soiled celebrated their act of domestic lawclothing is transferred more and more giving with generous draughts of to public laundries, in which large quantities of clothing from many sweetened with lump sugar at one homes and from numerous individu- and four a pound by the loaf, and so als are brought together where em- to bed, to dream of a people happy ployees come in intimate contact with the articles.

Public laundries should therefore be subjected to scrutinising inspection with the same energy that is devoted to the inspection of public bakeries and restaurants.

Our New Treaty With Nicaragua.

when it ratified the amended Bryan reaty with Nicaragua giving the United States perpetual and exclusive canal rights and control of Great Corn and Little Corn islands and Fonseca Gulf for naval bases. Aside from the fact that the European Powers will be forever barred, assuming ratification by the party of the second part, from building through Nicaragua a canal to compete with the Panama waterway, the time is coming when another canal joining the Pacific and the Atlantic will be needed by commerce. The United States will construct it with incidental advantages and without having to consult any other Power. There is no time like the present. that is to say, during the great war in Europe, to consummate this important agreement with Nicaragua. That consideration no doubt was conclusive with the Senate

It may be taken for granted that Sicaragua will ratify the treaty. She s to receive \$3,000,000-that is the present consideration-to be applied to her indebtedness or "other public welfare in a manner satisfactory to Washington. If a canal should be built by the United States the local dismissal of the dove of peace from benefits to Nicaragua would be inthe White House. There is no reason calculable. The acquisition of naval why the two should not dwell in peace bases by lease is alone worth the by side. A moderate prepared price to be paid, the primary object being to increase the protection of would insure to each perfect safety the Panama Canal. After ratificaand content, while permitting them tion by Nicaragua our Government will be wise to lose no time in pre

A bad precedent would have been the house might with great profit made if the United States had undertaken to apply the Platt amendment of our Cuban relation to Nicaragua, as was originally proposed by Mr. exact balance the necessities of his Buyan when he drafted the treaty, For a statesman who had so often rung the changes on the consent of the governed it was a remarkable exshelter, which may be permanent, in hibition of inconsistency and shortsightedness. Fortunately for the Pan-American ideal this condition was eliminated. Nicaragua will retain her sovereignty unimpaired and our southern neighbors will breathe more freely. That we should be consulted about the expenditure of what is a large sum of money to Nicaragua is not unreasonable, and it will be for vided each month an interesting and her advantage. The Monroe Doctrine word that is in its mind a united is of course involved in this new comwould join in the plea. The pact, for the defence of that is to be made easier.

tary order in council issues: "The committee being informed the West-India rum had been sold in this waship for a higher price than to asertained by the regulation of this committee at their last meeting. Breat ven therefore, for prevention of the like The Senate did a good day's work evasions and impositions in future, that

no greater prices than are fixed by the be demanded or received for any of the above articles of West-India produce, when sold in larger quantities than is

Of the further history of this atformed. Perhaps in the strains and stresses of the following months in the war racked Jerseys political economy had to take a back seat. But the Township Committee of the metropolis on the bank of the Passalc ad seen its duty and tried to do it. It had resolved, and resolved again. When its first resolutions were met by evasions the committee, in rebuttal, met the "imposition" with the other barrel. But the weight of the argument was on the other side. The fiat in one scale pan could not elevate the other, loaded with human appetite, the seller's determination to get the highest price, the readiness of buyers, who had it, to give it rather than do without their accustomed solaces of Jamaica spirits, Muscovado sugar, coffee and chocolate, as individual tastes might decide for cups of simple cheer or of inebriate exhiberation.

Political economy is not fillin', and the passion for governmental regulation which seizes men when they are set in the high places of government s a strange and mischievous renun ciation of those desires and determi nations which actuated them before they began trying to govern other folks swayed by the same desires. Even when its ideals are highest and its apparent need greatest, attempted control by lawmakers of the elementary forces of human nature is sure to have a "kick" for those who hold the gua, and to cause a "kick" by those in whose behalf it is supposedly loaded, aimed and discharged.

The "Bookman" at Twenty-one.

Chipper and cheerful as it was then a lusty infant, the Bookman celebrates its coming of age with the current issue; an incident worth the attention of those who buy and read books, as well as of those who borrow or merely write them.

Investigate Aviation in the Army. An investigation of the Aviation Corps of the army, as proposed by Senator Rosinson of Arkansas, has your name? become necessary; in fact, it would be a public scandal if the Senate were not to authorize the inquiry asked for. That aviation in the United States army is far below the it right, so I call myself Dick. military standard in Europe has long been known, and Congress must bear much of the blame for this condition. said regulations of this committee, shall But it comes with something of a shock that the Signal Corps has failed to make good use of its material and apparently does not take aviation soriously. What other conclusion can there be from the letters of Lieutentempt at regulation we are not in- ant-Colonel RERER and Captain Cowan which Senator Robinson has brought to the attention of the Senate?

The correspondence of these two army officers, who never expected explain. There had been an encamp that their letters would see the light, proves what Mr. Rosinson charges, that "aviation in the United States army is contemptibly inefficient," and that conditions in the Aviation Corps to keep physically strong, mentally have been concealed from the War awake and morally straight." Department. "Frankly," writes Captain Cowan to his superior, "I don't want to mut down in black and white over my signature my opinion about the way the Signal Corps has handled this work."

The record reflects a failure to improve the service that had become habitual. Even granting that the Sig- tle physiology." nal Corps was handicapped by limitations in organization imposed by Congress, it is not the way of the army to do poor work with its tools. We believe that a thorough inquiry will lead to the equipment of the service with an aviation department of which it can be proud.

The fact that yesterday the acting Secretary of War, stirred to action by Senator Robinson's strictures upon army aviation, appointed a board of officers to investigate the aviation school at San Diego should not affect the purpose of the Senate. It will be for the good of the army and will promote the national defence He to go to the bottom of conditions in the Aviation Corps and obtain information for corrective legislation by

STATE EFFICIENCY.

To the Editor of the Sun—Sir: Mr. Henry Kelly's letter in the Sun of February 12 on reforming the schools is the first expression of a statesmanlike idea on the subject that I have read from the pen of an American. His criticisms of existing inefficient conditions and the other questions. In paredness and the other questions. tions are well founded. The plan of answering recent queries put to hin reform outlined by Mr. Kelly has been by an organization, knowing his value reform outlined by Mr. Kelly has been in successful practice in Australia since 1874. In that country the schools are outside the range of politics and are managed by a commissioner of education whose tenure is permanent. The state builds the schools and pays the teachers according to the grade of cert. teachers according to the grade of certeachers according to the shad of the shad lage they may be assigned to by the state. The teacher in the remotest vilremotest vil-DAY as a 'The tariff cannot be taken state. The teacher in the remotest value of the tariff cannot be taken out to large receives as much pay as a large receives as much pay as a party politics until all parties agree of State and national bank storage that the curriculum is the largest city. The curriculum is So long as one party favors a tariff for the amount of State taxes to the amount of State alike in every state school. Every school is visited periodically by an inspector, who examines every pupil, and the teacher receives an additional compensation based upon the percentage of pupils passing the examinations. The teachers themselves are examined annually and promoted or demoted according to the results. In all communities ing to the results. In all communities where suitable residences may not be remided the state has erected teachers' residences. There are villages with a state school and teachers' residences, a victim of public abuse.

"I do not believe in a tariff commishaving only half a score of pupils, but in these small places the teacher may in these small places the teacher may act as postmaster and in some instances act as postmaster and in some instances as railroad station master, for in Ausralia all the railroads, telegraph and
